## Presidio Announces General Availability of Presidio Concierge

**New York, NY** – August 6, 2018 – [Presidio, Inc.](#) (NASDAQ:PSDO) (“Presidio” or the “Company”), a leading North American IT solutions provider delivering Cloud, Security and Digital Infrastructure solutions to middle-market customers, today announced the General Availability (GA) of Presidio Concierge, its cloud subscription management and analytics platform. Presidio Concierge provides a simplified view of subscription capacity, status and consumption across multi-cloud services. With Presidio Concierge, customers have the ability to drill down aggregate data on their Cloud-based services (SaaS, IaaS, PaaS) and understand utilization and consumption metrics, including billing/invoicing information. Customers can analyze spending on services, visualize usage patterns and identify savings to ultimately make better procurement and spending decisions.

Presidio launched the tool in April to a select group of early adopters and after a set of Early Field Trials, now have over 15 customers currently using Presidio Concierge in production. One popular use case is to manage their WEBEX subscription data.

Brad Shafton, Director, Innovation & UX, Hologic, stated, “The Presidio Concierge portal provides invaluable insights on our WebEx service. Simplified views of usage and billing, presented in a way that is actionable, allows Hologic to optimize spend and will save time understanding consumption. Presidio Concierge is a significant value-add and will provide self-service tools and transparency that will simplify the way we do business.”

Bob Cagnazzi, Chief Executive Officer of Presidio, said, “Our customers are spending more and more money on cloud-based and subscription-based services like Office 365, AWS and Cisco WEBEX. One big challenge we heard from our customers is the lack of visibility. With Presidio Concierge, we provide a single dashboard to manage all their subscriptions, understand usage and consumption and have the ability to make smart spending decisions. We can then advise customers on spending and performance optimization metrics to help our customers save money and maximize the value of their cloud investments.”

### ABOUT PRESIDIO
