“We are extremely pleased with our results for the first quarter, where we delivered total revenue growth of 3.7%, Adjusted EBITDA growth of 15.8% and Pro Forma Adjusted Net Income growth of 20.4%. We achieved solid top-line growth, driven by robust client demand for our Cloud and Security solutions, and attractive profitability. We continue to deliver strong cash flow generation, which has allowed us to enhance our financial flexibility, as demonstrated by reductions in long term debt and net total leverage,” said Bob Cagnazzi, Chief Executive Officer of Presidio.

Cagnazzi continued, “We are encouraged by our strong start to the year, and we are confident in our ability to achieve our outlook for Fiscal 2018, which includes: Total Revenue growth of approximately 5.5%; Adjusted EBITDA margin in the low 8% range; and Pro Forma Diluted EPS growth in the high single digit range. In addition, we expect to finish Fiscal 2018 with our net total leverage ratio in the mid-2x range, excluding any material strategic acquisitions. We continue to execute against our strategic growth initiatives to deliver earnings growth, margins ahead of our peers, and consistent deleveraging to drive shareholder value creation.”

## First Quarter Fiscal Year 2018 Highlights

- Total Revenue for the quarter ended September 30, 2017 increased \$27.3 million or 3.7% to \$765.0 million compared to Total Revenue of \$737.7 million in the prior year's first quarter. The increase in total revenue resulted from an increase in client demand across both Cloud and Security solutions along with a higher proportion of services as part of our solutions, partly offset by a decline in Digital Infrastructure.
  - Security revenue increased 63.4% to \$109.0 million in the three months ended September 30, 2017, compared to \$66.7 million in the three months ended September 30, 2016, as continued high profile security breaches have driven strong demand for our security solutions. As the security world becomes increasingly complex, we have seen that customers are turning to security experts like Presidio for advanced security solutions and management. Our next generation risk management solution ("NGRM") provides our customers unique insight into their security posture along with key gaps and remediation recommendations. This in turn drives advanced security products and technologies as customers look to remediate security gaps. We are seeing growth across our portfolio of security services and technology partners.
  - Cloud revenue increased 21.3% to \$135.5 million in the three months ended September 30, 2017 compared to \$111.7 million in the three months ended September 30, 2016, driven by strong demand for our private and multi-cloud solutions including converged/hyperconverged private cloud solutions alongside solutions leveraging public software-as-a-service ("SaaS"), infrastructure-as-a-service ("IaaS") and hyper scale providers. We have seen that customers are increasingly looking to leverage best of breed solutions in the multi-cloud world especially around data center modernization and IT transformation driving strong consumption of our product offerings & lifecycle services including manage and operate services for private and public cloud solutions.
  - Digital Infrastructure revenue decreased 6.9% to \$520.5 million in the three months ended September 30, 2017 compared to \$559.3 million in the three months ended September 30, 2016, led by a move towards multi-cloud solutions from traditional infrastructure.
- Total Gross Margin for the three months ended September 30, 2017 increased \$7.8 million or 5.2% to \$156.4 million compared to \$148.6 million in the prior year quarter and Total Gross Margin as a percent of Total Revenue expanded to 20.4% in the three months ended September 30, 2017 from 20.1% in the prior year quarter. The expansion in Total Gross Margin was due to expanding margins in product revenue, specifically data center and networking infrastructure technologies as well as an increase in the margins on software subscription solution offerings.
- Net Income for the three months ended September 30, 2017 was \$19.8 million, or \$0.21 of Net Income per diluted share, compared to a Net Income of \$5.6 million, or \$0.08 of Net Income per diluted share, in the prior year quarter. We benefited from the following:
  - Higher Total Gross Margin and improved operating efficiency in the form of lower selling, general and administrative expenses,
  - A decline in transaction costs in the three months ended September 30, 2017, as compared to the prior year, and
  - A reduction in interest expense in the three months ended September 30, 2017, attributable to (1) the redemption and retirement of our senior and subordinated notes in connection with our March 2017 initial public offering, (2) the impact of the January 2017 repricing of our term loan facility, and (3) the impact of deleveraging.
- Adjusted EBITDA increased \$9.2 million, or 15.8%, to \$67.4 million for the three months ended September 30, 2017, from \$58.2 million for the three months ended September 30, 2016. Adjusted EBITDA margins expanded to 8.8% for the three months ended September 30, 2017 from 7.9% for the three months ended September 30, 2016 due to improved margins and improved efficiency in the form of lower selling, general and administrative expenses as a percentage of Total Revenue.
- Pro Forma Adjusted Net Income for the three months ended September 30, 2017 increased \$5.9 million or 20.4% to \$34.8 million, or \$0.36 per diluted share, compared to \$28.9 million, or \$0.31 per diluted share, in the prior year quarter. The increase resulted from higher Adjusted EBITDA and lower interest expense attributable to lower outstanding debt in the three months ended September 30, 2017.

## Capital Resources and Free Cash Flow

## About Non-GAAP and Pro Forma Financial Measures

Our management regularly monitors certain financial measures to track the progress of our business against internal goals and targets. In addition to financial information presented in accordance with GAAP, management uses Adjusted EBITDA, Adjusted Net Income, Pro Forma Adjusted Net Income, Pro Forma Diluted EPS and Free Cash Flow (collectively, "non-GAAP measures," as further described below) in its evaluation of past performance and prospects for the future. Our non-GAAP measures should be considered in addition to, not as a substitute for, or superior to, financial measures calculated in accordance with GAAP. They are not measurements of our financial performance under GAAP and should not be considered as alternatives to net income or revenue, as applicable, or any other performance measures derived in accordance with GAAP and may not be comparable to other similarly titled measures of other businesses. These non-GAAP measures have limitations as analytical tools and you should not consider them in isolation or as a substitute for analysis of our operating results as reported under GAAP and they include adjustments for items that may occur in future periods. However, we believe these adjustments are appropriate because the amounts recognized can vary significantly from period to period, do not directly relate to the ongoing operations of our business and complicate comparisons of our internal operating results and operating results of other peer companies over time.

We also adjust certain historical data on a pro forma basis following certain significant transactions. Specifically, we have provided a calculation of Pro Forma Adjusted Net Income to adjust our reported results for the fiscal quarter ended September 30, 2016 for lower after-tax interest expense associated with the redemption and repurchase of notes as part of our IPO as if the IPO occurred on July 1, 2016 and for lower after-tax interest expense associated with the term loan repricing that occurred in January 2017 as if the repricing occurred on July 1, 2016. Pro Forma Adjusted Net Income is for illustrative and informational purposes and is not intended to represent or be indicative of what our financial condition or results of operations would have been had the transactions occurred on the dates indicated. Pro Forma Adjusted Net Income should not be considered representative of our future financial condition or results of operations.

## Additional Information

On February 24, 2017, the board of directors of the Company declared a 2-for-1 stock split of the Company's common stock in the form of a stock dividend payable on each share of common stock issued and outstanding as of February 24, 2017. The number of shares subject to and the exercise price of the Company's outstanding options were adjusted to equitably reflect the split. All common stock share and per-share data included in these financial statements give effect to the stock split and have been adjusted retroactively for all periods presented.
